DETAILED ACTION

Response to Arguments

1. Applicant's arguments, amendment, filed 12/19/05, with respect to Burns have been fully considered and are persuasive. The rejection of claims 23-26 has been withdrawn in that it does not appear that the spring of Burns is capable of determining a delay by comparing the current temperature data with the temperature performance profile.

Election/Restrictions

2. Claim 23 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claim 12, directed to the species of a percussion firing pulse is no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

3. Claims 12, 15 and 23-26 are allowed.

4. The following is an examiner's statement of reasons for allowance: The prior art of record does not anticipate the claimed method for igniting a cartridge to launch a projectile using

Art Unit: 3641

a first initiator and a second initiator comprising the steps of transmitting a firing pulse to fire the first initiator, providing a signal from the first initiator to a decision event for receiving current temperature data from a temperature sensor, and determining a delay by comparing the current temperature data with a temperature performance profile, counting down the delay and transmitting a firing signal to fire the second initiator.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
